

Supporting GCF Programming via AP-PLAT

*Observations and lessons from UNDP's
experience*

Yusuke Taishi

UNDP Senior Technical Advisor

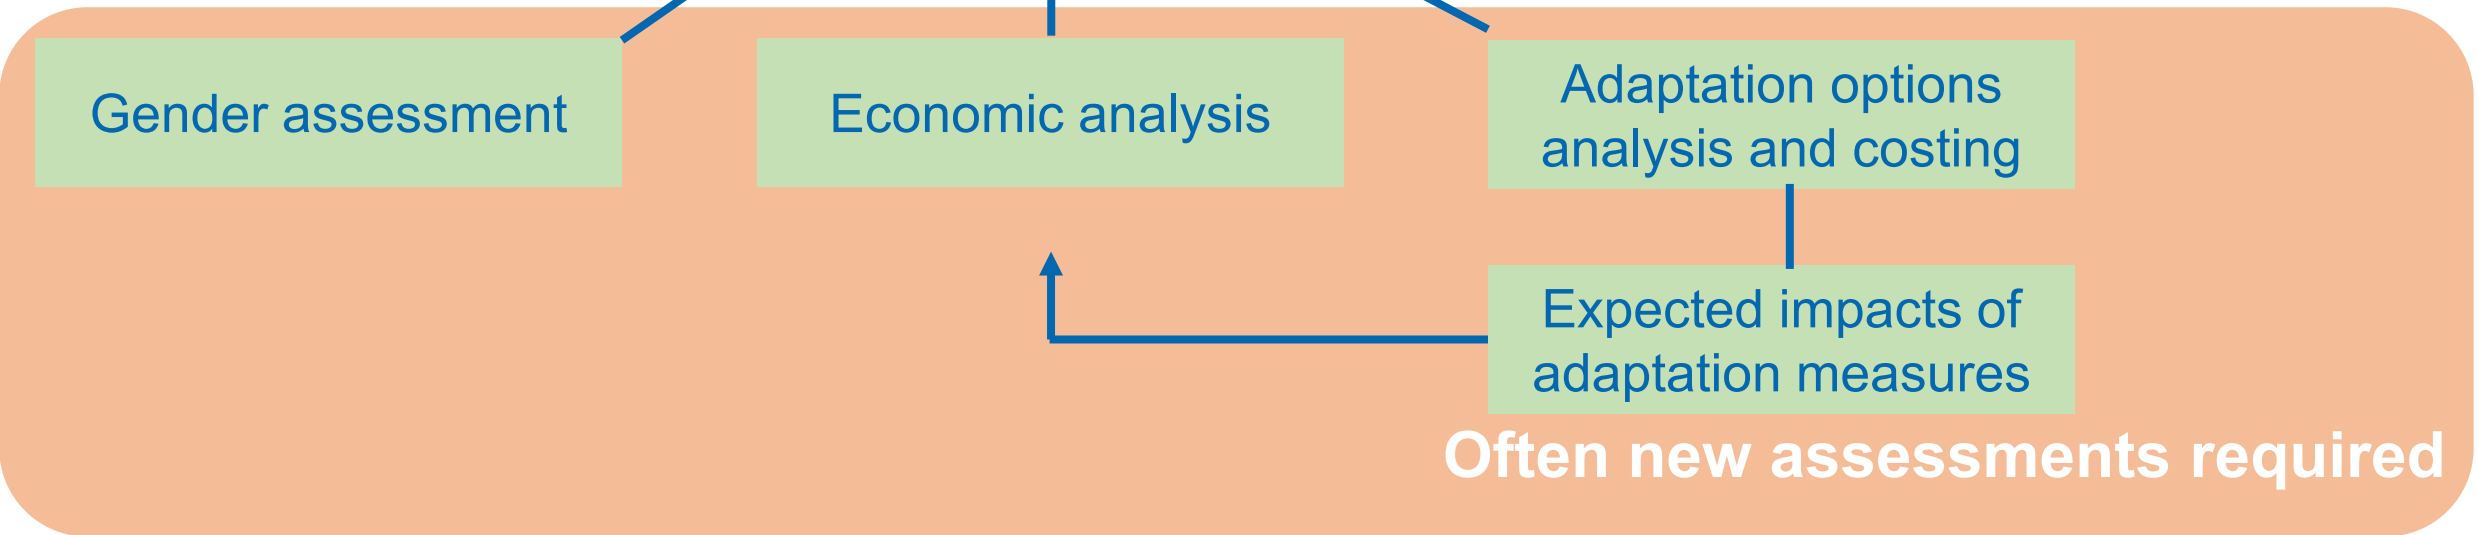

We need to keep in mind...

1. Information requirements are extremely high
2. Much of it needs to be tailored
3. Designing GCF projects takes time (avg 3-5 years)
4. GCF itself is changing

1. Understanding of the processes & procedures

- NDA request
- Verification of the priority in the Country Programme
- Examination of adaptation investments
 - Broad theory of change
 - Financing instruments
 - Identification of AE based on financing instruments and risks
- NDA's consultation with GCF

2. How is climate information used in proposals?

Example of information requirements

- Agriculture
- Coastal protection
- Irrigation requirements
- Riverine flood management

3. Changes in GCF directions

- Priority on Direct Access Entities
